

## **RANGE IMPROVEMENT NOTICE**

3/22/19

The long-planned Berm and Drainage Improvement Project is scheduled to begin on April 1<sup>st</sup>, 2019. The construction is planned for completion within 90 days, after-which we will be enlisting member support to reconfigure our range targets and structures, necessary prior to re-opening the facility for member use. The length of time involved with this work will depend upon the response of membership work-team volunteers.

The Range will be closed effective Wednesday, 3/27/19, with workdays planned through Sunday 3/31/19 in order to prep the facility for the contractor to begin on Monday. Please contact Matthew Gunning, PGC Executive Range Officer, to offer your support in these efforts.

Stay tuned for project updates on this web-page and club email notices.
