

PGC Membership Application FAQ's

I would like to see the range facilities before deciding whether to become a member.

There are a couple of ways to experience Palmetto Gun Club before becoming a member:

- First is to ask a current member to bring you over as a guest. You may do this twice before you must submit your application.
- The second way is to attend a weekend match. The general public may attend matches after checking in with a Match Director and paying the required fee. Check the club calendar to find a match that interests you.

Note: Any non-members found on the premises not in the company of a member, or not signed in for a match, will be escorted off of the property!

I'm new to the area and do not know any club members. Is sponsorship necessary? How do I get a sponsor?

Sponsorship is a necessary part of the application process. There are two ways to meet PGC members and obtain sponsorship.

- The first method is to attend a weekend match. Many PGC members participate in matches and are happy to meet new candidates. The general public may attend matches after checking in with a match director and paying the required fee. Check the club calendar to find a match that interests you.
- The second way is to attend a monthly meeting and meet the members there. Make sure to complete the online application prior to attending a member meeting.

There are many steps to the application process. Do I have to attend each one?

The application steps are necessary to determine if the candidate is suitable for the club, including the ability to legally and safely handle firearms.

- The on-line application may be activated at a member meeting in person or by the sponsor or other club member. Only after the application is activated, will the first vote be scheduled for a later meeting.
- Of the two votes, the candidate must attend at least one in person, and the candidate's sponsor or other club member may stand in for the candidate for the other vote.
- The candidate must attend the club orientation in person.
